Fragrant HYACINTHS

The popular Dutch Hyacinths with their rich fragrance fill an important place in the early spring garden. As formal bedding plants they have few equals. They also provide desirable and striking color masses in the foreground of shrub borders as well as in the perennial garden—in fact, wherever an early spot of color is desired. Plant them informally in drifts and they will scent the spring garden as no other plant can do.

The following 12 varieties are the finest obtainable in their color classes. The size we are offering for outdoor planting is 15 to 16 cm., which is ideal for the average garden.

Any of the following, 6 for \$1.75; 12 for \$3.35; 25 for \$6.50; \$24.00 per 100

LOUISE DE COLIGNY

Louise de Coligny. In our estimation this is the most graceful variety ever offered. The reflexing habit of the perianth, which is pure white and of good substance, tends to throw the neat apricot-pink cup into focus. Shows its color immediately on opening, while some of the other pinks do so the second or third day. Another and very pleasant attraction is that it is strongly fragrant. \$2.25 each; 3 for \$6.00; 6 for \$10.50.

Pink Rim. Stiff, pure white perianth of good form. The cup is pale citron-yellow with a very distinct light picotee-pink rim. This variety draws attention wherever shown, for it is quite distinct from all others. Strong, tall stem. 85c each; 3 for \$2.25; 6 for \$4.00; 12 for \$7.50.

Siam. Well-formed, pure white perianth. The wide, flaring trumpet is apricot color, changing to soft pink. A giant among the pinks, it will be a leader as soon as it becomes better known. 75c each; 3 for \$2.00; 6 for \$3.50; 12 for \$6.00.

SIAM

The New PINK DAFFODILS

Delicate pastel tints—apricot to pink—will appear in various stages of development. Some are yellow when they first open, fading to different pink tones. Others show pink at first opening, getting deeper as the flower matures. You simply cannot help liking them. Plant a few in your garden this fall, and let their lovely blooms thrill you next spring.

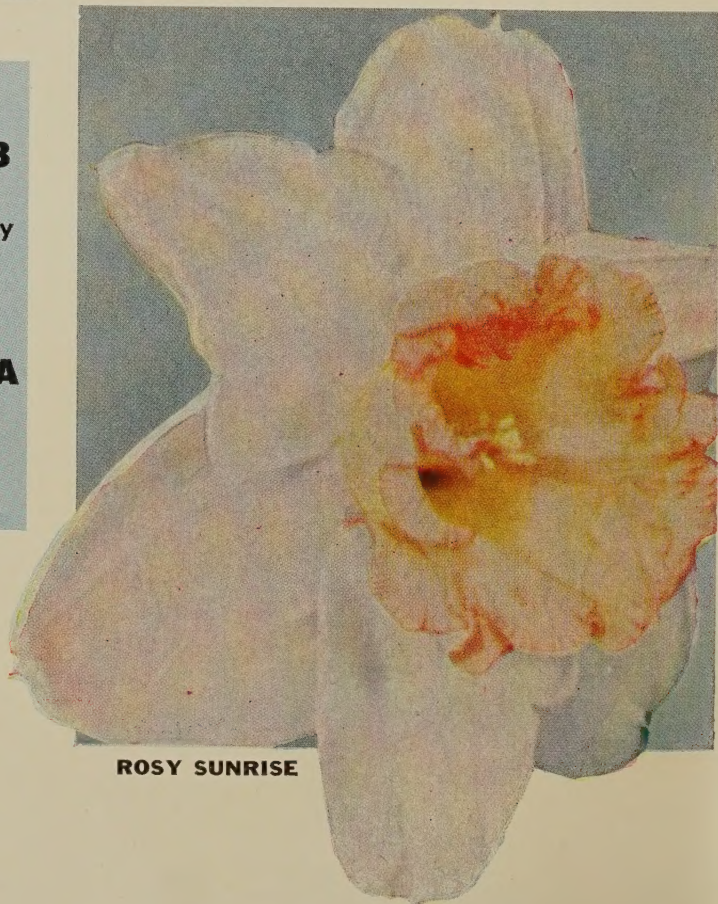

PINK RIM

PINK GLORY

Pink Glory. The "orchid" among Narcissi. Pure white perianth, somewhat loose but graceful, with an exquisite long trumpet opening light Indian yellow, soon shading to a lovely pink, inside deep pinkish apricot. When used in a small corsage with some asparagus green, this is as delicate as an orchid. \$1.00 each; 3 for \$2.50; 6 for \$4.50; 12 for \$8.50.

Rosy Sunrise. The queen of the new pink novelties. Pure white perianth of good substance, with a large, strongly fringed trumpet of pure salmon-apricot with distinct rose-pink shading. The inside of the trumpet turns to soft Indian yellow when fully developed. Free-flowering. \$2.00 each; 3 for \$5.00; 6 for \$9.00.

SPRING TO FALL

HARDY AMARYLLIS (Magic Lily)

See color illustration

Halli (*Lycoris squamigera*). Green foliage grows until July, when it ripens and disappears. About a month later the flower stalks rise 2 to 3 feet, developing 8 to 12 large, lily-shaped flowers of delicate lilac-pink. Perfectly hardy. Cover crown 4 inches. \$1.25 each; 3 for \$3.00; 6 for \$5.00.

STERNBERGIA LUTEA

They are bright crimson in color, about 1½ inches across, the sickle-shaped segments being scarcely crisped; filaments are bright red. The leaves appear after the flowers. They are easily grown indoors in the North, but in the South may be grown outdoors in ordinary good garden soil. 6 for \$1.00; 12 for \$1.85; 25 for \$3.50.

EREMURUS (Foxtail Lilies)

These Desert Candles from Turkestan are objects of curiosity in American gardens. Hardy, they make a spectacular show from late May through June. Plant 6 inches deep in rich, porous, loamy soil. Foliage disappears after the flowers. Annuals may be planted close to them. Plant in groups of three or more. Those we offer are five years old or more, and of blooming size.

CROCUS

STERNBERGIA LUTEA

WILL BLOOM THIS FALL

This interesting and beautiful fall-blooming bulb resembles the Autumn Crocus but produces much larger blooms on sturdy, 6 to 8-inch stems. The flowers are rich, brilliant yellow. Unlike the Autumn Crocus and Colchicum, which it resembles in blooms, Sternbergia has the advantage of developing its graceful foliage shortly before it blooms, adding to the beauty of the richly textured flowers which come forth about the middle of September. Hardy and permanent in the garden. Plant the bulbs about 6 inches deep in a well-drained, sunny location. In the northern states give light protection over winter. Bulbs should be planted early, therefore send your order as soon as possible. 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

Peonies are long-lived plants that do not require transplanting unless they show signs of deterioration. For that reason it is worth while to be particular about the place where they are to be planted. Choose a sunny location that gets good drainage. Dig deep, and use some well-rotted cow manure or a commercial fertilizer to enrich the soil. Bonemeal is also recommended.

Fall is the best time to plant Peonies. Plant so that the eyes are 1 1/4 to 2 inches below the soil surface. The varieties offered here are the very finest in their class; only the highest rated are offered. The plants offered are strong, 3 to 5-eye, healthy plants and should give excellent results.

DOUBLE PEONIES

The number following the name means the rating of the American Peony Society.

(E) indicates earliest flowering varieties; (E-M) early to midseason;

(M) midseason; (M-L) midseason to late; (L) latest blooming varieties.

THERESE

Tree Peonies

This famous group is the shrub type. The stems do not die to the ground each year as the herbaceous Peonies do, and in the course of many years they will reach the height of 3 to 4 feet. Most varieties bloom in early spring—late April to the end of May, depending on the locality. They are of easy culture and grow anywhere other Peonies do. It is best, however, to plant them where they are sheltered from sweeping wind.

Prices quoted are for 2-year-old, 5-inch pot plants. Field-grown plants are available at 2½ times the prices quoted for potted plants.

We also have many additional varieties.

Archiduc Ludovico. Large; flesh-pink, turning to soft lilac. \$5.00 each.

Argosy. Single; pure yellow. \$10.50 each.

Athlete. Glazed mauve, shaded rose. \$5.50 each.

They are extremely showy in the garden and excellent as cut flowers for the home.

Oriental Iris are easily grown in any good average garden soil which is fairly rich and has good drainage. Divide the plants every three or four years, early in the spring or in September and October. Their average height is 2 to 3 feet.

Oriental Poppies

Oriental Poppies, with their brilliant gigantic blooms, are among the very finest perennials for the garden, particularly now that soft pastel tints are available, ranging from the softest of pink to deep red and white. They are easily grown and once established will live for many years. The best time to plant them is September and October. Poppies should be planted deeper than the general run of perennials. Set the crowns approximately 2 inches below the level of the ground. Mulch the first winter after planting with excelsior, pine branches, or other material of similar nature. This mulch should not be applied until the ground is frozen, possibly November till December, depending on the locality. The plants offered here are strong, field-grown specimens and should bloom satisfactorily next year. *Order now.*

Our Customers Say:

"I just can help telling you how pleased I am with the roses, mums, etc., that you sent me. The tulips, lilies and hyacinths were gorgeous and the envy of my neighbors. Believe me, when I order anything further it will be from your company."—EMMA M. ULRICH, Ohio.

"We received the rose bushes yesterday. They were fine. I have ordered flowers from twenty nurseries and I have never had as nice-looking plants and never had them packed so well and shipped in such good shape."—MRS. FRANK REITZ, Illinois.

"I just want to thank you for letting me have the Duke of Windsor daffodil bulbs last fall. You told me they were prize winners, and they surely were. In our daffodil show I took a ribbon for best specimen in whole show. So I felt encouraged and entered three in the Baltimore Daffodil Show and took a blue ribbon there. Everyone asked where I got them. They were the only ones in the show. So now be on the lookout for some more prize winners for me, as I will be wanting some. Every bulb I got had three blooms."—MRS. ANDREW N. ADAMS, Maryland.

"Received my roses and liked them so much that I'm ordering more. They were really nice fresh-looking plants and were packed so nicely."—MRS. W. M. FORBES, North Carolina.

"My three chrysanthemum plants arrived yesterday. I have never seen plants more beautifully packed. They arrived in perfect condition. It is a pleasure to open a plant package and find the contents as healthy and moist as when they came out of the ground. The narcissus mixtures and the tulips which I purchased from you were magnificent."—MRS. GEORGE DELANO, JR., Rhode Island.

"My dealing with you in the past has been very gratifying. . . . The bulbs were the best I have seen and the blooms huge and brilliantly colored."—FRANK COOK, Ohio.

"I have received your catalogs and enjoy them always. And I enjoy your plants still more because they are the very best. It is certainly a pleasure to deal with such good company as you have always been."—MRS. W. C. PATRICK, North Carolina.
